

WIRELESS MICROPHONES

iLive 1 UHF Handheld Wireless Transmitters

iLive 1 handheld wireless microphone transmitters.

iLIVE 1 handheld transmitter

iLive 1 handheld wireless microphone transmitter for iLive 1 true diversity system. Automatic channel synchronization and automatic frequency selection Advanced design PCB and excellent quality metal body handheld microphone transmitter equipped with dynamic cardioid microphone capsule makes these sets very universal for use on stage and in the conference rooms.

Technical Specifications	iLIVE1
Carrier frequency range	606 MHz - 621 MHz
Modulation	FM
Channels	32
Audio frequency response	45 Hz - 18 kHz
S/N ratio	> 105 dB
Antenna	Built-in spiral antenna
Transmitter's power	3 mW
Working range	90 m (Note: actual range depends on RF signal absorption, reflection and interference)
Polar pattern	Cardioid
Dimensions	240 mm (length)
Weight	302 g
Material	Aluminum
