

## ABOUT

The Gekko Gripper has been designed to make electricians' jobs easier when routing cables through floor voids.

- Uncoil the string from the spool and place the magnet (with string attached) under the floorboard
- Place the larger magnet on top of the floorboard
- Place any cable (up to 10mm) into the Mini Eye & Ring and secure in place
- Use the thumb grip to pull the cable through the floor void with ease
