

ABOUT

The Glider X2 has been designed to traverse the more uneven surfaces such as roof tiles. The Glider X2 skips over all sorts of obstructions and is cleverly designed to take other attachments for super efficiency; for example, screw a Super Grip inside the Glider and attach a cable. You can even turn the unit around and screw a Super Beam to the front of the Glider.

APPLICATION

- Route • Skip Over Obstructions

SPECIFICATION

Product Name	Glider
Item Code	SRGLIDEX2
Length	340mm (ave between fittings)
Attachments	N/A

CONTENTS

1 x Glider X2

SPECIFICATION

Maximum Working Temperature

Long Term: 80°C

Short Term: 170°C

Minimum Working Temperature

-30°C
