Humly Room Display

HRD1001

The **Humly Room Display** is the perfect interactive display for your collaboration spaces. It will help you to find the space you already booked, or guide you to one that is available right now. On the display it is clear who has booked the room and for how long. With the Humly Room display you no longer need to disturb an ongoing meeting and you will instantly remove much of the frictions related to meeting room reservations. Its iconic timeless design will fit well into any modern office as its aesthetic have been developed to become part of the interior.

Sold in packages of 10 / 6 / 1 unit(s)

Long product life.

Unlike many other competing solutions at the market, Humly Room Display is a purpose-built hardware. Each component is selected to ensure that the device can be up and running 10 hours per day for years without failing. This is the reason why Humly Room Display has an estimated lifetime of +5 years.

Scalable.

Humly Room Display is scalable to fit the needs of enterprise customers. Manage your fleet of Room Displays remotely and serve over 500 room displays from a single server.

Secure.

Humly is proactively working with security and is related issues and is partnering with security consultants who is performing regular penetration tests. This way we can ensure enterprise class security.

Seamlessly integrated.

Humly has an open API that makes it easy to build deep seamless integrations with other solutions. Next to this, Humly is proactively working on providing additional customer value by making integrations with market leading solutions within smart office and collaboration technology.

Design focused.

Humly has worked with awarded design team to design Humly Room Display. The result is a modern device that complements a modern office with a floating effect and full RGB LED light creating an aura that reflected on the wall.
