

Standard Set **CRSS**

With 5m (16ft) of length, the Standard Set gives you 3 different rod flexibility choices. An ideal starter set.

Why is it the ideal starter set in the Cable Rod System?

- 5 metres of rod, 3 flexibilities and 5 innovative attachments.
- Designed & Manufactured in the UK.
- Adoxim 5 is EXCLUSIVE to Super Rod, the only rod material that has been specifically designed to reduce splintering and increase flexibility.
- AXM fittings designed for strength - all fittings on the end of our rods are mechanically crimped, which allows them to carry a load of 200kg. This is very important when pulling cables every day.
